Asbestos-Containing Materials Inspection

Dear Mr. Cuppetilli:

Pursuant to your request, Environmental Maintenance Engineers, Inc. (EME) had Environmental Testing & Consulting perform an Asbestos-Containing Materials Inspection as directed at the above referenced location. This service was performed by Chris Meadows and James Brown on December 12, 2018.

Areas were thoroughly inspected in accessible and inaccessible areas to the greatest extent feasible to determine the presence or absence of suspect asbestos containing building materials prior to demolition. We also reviewed Tammy Bell, DEQ requests and made sure we included those items. The report includes the procedures and methodologies, analytical laboratory results and any applicable conclusions and recommendations made during the course of the inspection.

There are some ACM materials and we're currently getting quantities so I can forward them to you.

EME looks forward to working with you on this project. If you have any questions or if I can be of further assistance please do not hesitate to call me at 313.791.2600.

Sincerely,

ENVIRONMENTAL MAINTENANCE ENGINEERS, INC.

Michael L. Kelly
Michigan Inspector #A5851
