Dear Neighbor,

Due to the recent inclement weather the perimeter fence around the Lafayette West project site was blown over. We appreciate the calls and emails from neighbors expressing concern for the safety of the site, especially considering the current demolition activities.

As of Friday, March 15th the temporary fence has been stood up to secure the perimeter of the site. The temporary fence was also reinforced to avoid any future issues while we work with our contractor on the placement and installation of the construction fence that will remain throughout the construction process.

New concrete barricades have been delivered to the site and will be erected with other fencing components to create the permanent construction fence. We anticipate the construction fence installation will begin the week of March 18th. The fence banner discussed during the community meetings and displayed during the demolition ceremony will be placed on the fence after it is completed.

We appreciate your patience while we worked through fence placement issues which needed to be coordinated with overall site logistics, the City and others. If you have any questions on the information, please contact:
